

Sales Analysis Dashboard Report

Project Objective

The objective of this project is to analyze sales performance using Excel Pivot Tables and Dashboards. The project aims to identify sales trends, revenue growth, customer loyalty patterns, regional performance, and pricing insights to support data-driven business decisions.

Dataset Description

The dataset contains transactional sales data along with customer, product, and store information. Multiple tables were connected using data modeling techniques to create meaningful reports and visualizations.

Main tables used:

1. Sales_Fact
2. Customer_Dim
3. Product_Dim
4. Store_Dim

Visualizations and Insights

Visualization 1: Store-wise Total Sales by Loyalty Level

Insight:

1. Sales performance varies across stores.
2. Premium loyalty customers contribute significantly to total revenue.
3. Some stores consistently outperform others.

Visualization 2: Total Revenue Analysis

Insight:

1. Revenue increased from 2023 to 2024.
2. Revenue remained stable with slight fluctuations during 2025.
3. Certain stores generated higher revenue than others.

Visualization 3: Date-wise Analysis of Average Unit Price by Discount

Insight:

1. Average unit price changes according to discount levels.
2. Higher discounts generally reduce average selling prices.
3. Pricing trends can be monitored over time.

Visualization 4: Total Sales by Region

Insight:

1. One region records significantly higher sales than other regions.
2. Regional performance differences highlight market opportunities.

3. High-performing regions can be used as benchmarks for improvement.

Dashboard Screenshot

dashboard screenshot here in the final report.

Dashboard Includes:

1. Store-wise Sales Analysis
2. Revenue Analysis
3. Average Unit Price Analysis
4. Regional Sales Analysis

Conclusion

The Sales Analysis Dashboard successfully provides a comprehensive overview of business performance. Through Pivot Tables, charts, and interactive filters, the dashboard highlights sales trends, revenue growth, customer loyalty behavior, pricing patterns, and regional performance. The insights generated can help management make informed decisions, improve sales strategies, and enhance overall business growth.
